### Sea Urchin Chrysanthemum

*Chrysanthemum 'Sea Urchin'*

Height: 18 inches

Spread: 24 inches

Sunlight: ☉ ●

Hardiness Zone: 4a

Other Names: Garden Mum, Korean Mum, Dendranthemum

#### Ornamental Features

Sea Urchin Chrysanthemum is smothered in stunning creamy white daisy flowers with lemon yellow overtones and rose tips at the ends of the stems from early to late fall. The flowers are excellent for cutting. Its fragrant ferny leaves remain green in colour throughout the season. The fruit is not ornamentally significant.

#### Landscape Attributes

Sea Urchin Chrysanthemum is an herbaceous perennial with an upright spreading habit of growth. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

Sea Urchin Chrysanthemum is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Container Planting

#### Planting & Growing

Sea Urchin Chrysanthemum will grow to be about 18 inches tall at maturity, with a spread of 24 inches. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years.

SINCE 1937

## SECOND NATURE

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Sea Urchin Chrysanthemum is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the larger thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our store for more information on how to protect it over the winter months.
