SECOND NATURE

Strawberry Lemonade Tickseed

Coreopsis 'Strawberry Lemonade'

Height: 12 inches

Spread: 18 inches

Sunlight: ☉

Hardiness Zone: 4a

Ornamental Features

Strawberry Lemonade Tickseed is smothered in stunning cherry red daisy flowers with harvest gold eyes at the ends of the stems from early summer to early fall. The flowers are excellent for cutting. Its attractive ferny leaves emerge yellow in spring, turning chartreuse in colour throughout the season. The fruit is not ornamentally significant.

Landscape Attributes

Strawberry Lemonade Tickseed is an herbaceous perennial with a mounded form. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Strawberry Lemonade Tickseed is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Container Planting

Planting & Growing

Strawberry Lemonade Tickseed will grow to be about 12 inches tall at maturity, with a spread of 18 inches. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years.

SINCE 1937

SHELMERDINE

SECOND NATURE

This plant should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil pH, but grows best in poor soils. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Strawberry Lemonade Tickseed is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers and foliage against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our store for more information on how to protect it over the winter months.
