

Bachman's™

Growing Since 1885

Butterflies Magnolia Clump *Magnolia 'Butterflies'*

Height: 20 feet

Spread: 20 feet

Sunlight: ○ ●

Hardiness Zone: 5

Description:

An exquisitely beautiful magnolia whose flowers are among the truest yellow of all hybrids; a small tree or large shrub with a neatly pyramidal form and large relatively coarse leaves, flowers appear before the foliage; an ideal landscape or garden accent

Ornamental Features

Butterflies Magnolia Clump is covered in stunning fragrant yellow cup-shaped flowers held atop the branches in early spring before the leaves. It has dark green deciduous foliage. The large pointy leaves turn coppery-bronze in fall.

Landscape Attributes

Butterflies Magnolia Clump is a multi-stemmed deciduous tree with a shapely oval form. Its relatively coarse texture can be used to stand it apart from other landscape plants with finer foliage.

This is a high maintenance tree that will require regular care and upkeep, and should only be pruned after flowering to avoid removing any of the current season's flowers. It has no significant negative characteristics.

Butterflies Magnolia Clump is recommended for the following landscape applications;

- Accent
- General Garden Use

Planting & Growing

Butterflies Magnolia Clump will grow to be about 20 feet tall at maturity, with a spread of 20 feet. It has a low canopy with a typical clearance of 2 feet from the ground, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for 50 years or more.

Bachman's™

Growing Since 1885

This tree does best in full sun to partial shade. It requires an evenly moist well-drained soil for optimal growth, but will die in standing water. It is not particular as to soil type, but has a definite preference for acidic soils. It is highly tolerant of urban pollution and will even thrive in inner city environments. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This particular variety is an interspecific hybrid.
