## Candy mint Flowering Crab

*Malus sargentii* 'Candy mint'

Height: 10 feet

Spread: 15 feet

Sunlight: ○

Hardiness Zone: 4

Other Names: Sargent's Flowering Crab, Roseybloom

### Description:

A beautiful ornamental by all accounts with its wide-spreading horizontal branching, sweet pink flowers, deep purple fruit which persist into winter, and showy rich purple leaves; excellent choice for a garden accent

### Ornamental Features

Candy mint Flowering Crab is smothered in stunning clusters of fragrant pink flowers with shell pink overtones and rose edges along the branches in mid spring before the leaves. It has attractive deep purple deciduous foliage which emerges dark green in spring. The pointy leaves are highly ornamental and turn yellow in fall. The fruits are showy deep purple pomes carried in abundance from early to mid fall. The smooth brown bark and brick red branches add an interesting dimension to the landscape.

### Landscape Attributes

Candy mint Flowering Crab is a deciduous shrub with a strong central leader and a stunning habit of growth which features almost oriental horizontally-tiered branches. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting birds to your yard. It has no significant negative characteristics.

## **Planting & Growing**

Candymint Flowering Crab will grow to be about 10 feet tall at maturity, with a spread of 15 feet. It has a low canopy with a typical clearance of 2 feet from the ground, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for 40 years or more.

This shrub should only be grown in full sunlight. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.
