Lime Glow Juniper

Juniperus horizontalis 'Lime Glow'

Height: 18 inches

Spread: 3 feet

Sunlight: ☉ ●

Hardiness Zone: 3

Description:

An exceptionally colorful evergreen groundcover shrub unlike any other of this species, with lime green foliage that brightens to yellow over the summer, finally turning a bronzy copper in fall; very low growing and very showy

Ornamental Features

Lime Glow Juniper is a dwarf conifer which is primarily valued in the garden for its broadly spreading habit of growth. It has attractive yellow evergreen foliage which emerges lime green in spring. The scale-like sprays of foliage are highly ornamental and turn coppery-bronze in the fall, which persists throughout the winter.

Landscape Attributes

Lime Glow Juniper is a multi-stemmed evergreen shrub with a ground-hugging habit of growth. It lends an extremely fine and delicate texture to the landscape composition which should be used to full effect.

This is a high maintenance shrub that will require regular care and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

Lime Glow Juniper is recommended for the following landscape applications;

Growing Since 1885

- Mass Planting
- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Groundcover

Planting & Growing

Lime Glow Juniper will grow to be about 18 inches tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub does best in full sun to partial shade. It is very adaptable to both dry and moist growing conditions, but will not tolerate any standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selection of a native North American species.
